- ✓ IV&Drive – The world's first handles integrated into IV poles .
- ✓ CardiacChair – Easily adjustable for better treatment, safety and comfort.
- ✓ FlexiDrive – A shock-absorbing spring-loaded 5<sup>th</sup> castor.
- ✓ SoftDrop – A smooth, silent and safe movement of siderails.
- ✓ EasyBrake – A four-sided braking system for easier accessibility.

## Help Shape the Future of Africa

Left untreated, anemia in its most severe form can be fatal. Preschool age children and women, particularly pregnant women, are especially at risk and childhood anemia presents a major public health burden in many African countries. Untreated anemia may in fact have devastating effects on the prosperity of an entire society.

Let us make it easier for you to detect those at risk. By providing access to accurate anemia screening tools whether in hospital or in the field, you can protect those who will be shaping the future of Africa.

The robust HemoCue Hb 301 kit contains everything you need for convenient anemia testing. Being battery-operated and including microcuvettes adapted to demanding climates, it provides lab accuracy wherever you are.

To find out how a drop of blood in combination with HemoCue's point-of-care testing can make a difference, contact your HemoCue representative or email [info@hemocue.se](mailto:info@hemocue.se)

Hemoglobin

HbA1c

Glucose

Urine Albumin

WBC / WBC DIFF

HemoCue is part of the Radiometer Group and has been a leader in point-of-care medical diagnostics for over 30 years. We specialize in giving healthcare providers lab-quality accuracy with results comparable to that of a clinical lab. Visit [hemocue.com](http://hemocue.com)
